FIGURE 03.11A.1: Initial experimental setup prior to any changes. All components seem to be in place. Noticed no caps on extra APD detectors.

FIGURE 03.11A.2: Experimental setup within black box. Laser and powersupply and all other relevant components outlined in P03.11A turned off prior to opening.

FIGURE 03.11A.3: Initial fit of coincidence values and expected statistical correction. Slope found is given by $\tau = 0.0243 \pm 0.0006$ with a $\chi^2_{\text{red}} = 0.03$.
